Re: Quiltville May 3, 2020 Blog Post

Dear Bonnie:

Due to the nature of the subject and its inherent complexity, and the essence of time, I will endeavor to make this as brief and blunt as possible. This covid-19 debacle is wrong on so many levels, it is difficult to know where to start.

- It is most unfortunate you chosen to be a shill to advance the propaganda of the Government/Globalist media. You need to educate yourself. Start with the enclosed article. You are obviously not aware that in the United States we have a Bill of Rights and a Constitution, which is the premier law of the land. If you type [www.hillsdale.edu](http://www.hillsdale.edu) into your browser, you can access online classes that can teach you about our founding documents, free of charge. It's also a great refresher for those who have not attended a civics class in many years.
- Bonnie, do you remember the various cruise ships that headlined many Government news sources back in February and March? Those ships were floating at sea for weeks with thousands of passengers aboard, some with the covid-19 virus. The environments within those ships were perfect for the rapid promulgation of The Virus. Thousands of passengers should have perished from those ships. But it didn't happen (thank God) so the non-infectious rate and recovery rate of those infected has not been reported at all or only very briefly. Why? Because it doesn't fit the desired narrative. In a real pandemic there are tens of millions of deaths, i.e. the Spanish flu of 1918. We are no where near those numbers. As a matter of fact, we have no idea how many people have actually been infected. I heard at a recent news conference, with my own ears, Dr. Birx declaring that anyone who dies with whatever malady, if they have the covid virus in their system, the death will be counted as a covid fatality. How accurate is that??? Furthermore, hospitals receive approximately \$13,000 of taxpayer money for each declared covid patient, \$39,000 if placed on a ventilator. It appears there is quite a financial reward for padding the covid numbers. If the numbers are padded in the U.S., it wouldn't be unreasonable to question the numbers in other countries as well. The virus is real, the pandemic is not. The models that the Bureaucrats white coats are touting have been wrong 100% of the time (thank God once again). This should make people pause and think, but it does not. The man producing the flawed models that Drs. Fauci and Birx are basing their pronouncements on, is a British man named Neil Ferguson. Do some research and find out how "reliable" this con man's number really are. A good place to start is: [www.nomorefakenews.com](http://www.nomorefakenews.com).
- A report was recently released, stating approximately 80,000 souls perished during the 2019-2020 traditional influenza season. No hand-ringing, furrowed brows with dire predictions from the purveyors of doom. Why not? Aren't those souls as precious as a person with the covid flu? The hypocrisy is carefully noted.
- "Families are impacted in ways I can't imagine". It's obvious YOU HAVE NO CLUE as to how this faux pandemic is affecting this country & others around the world. Are you totally thoughtless as to where your food comes from??? It doesn't magically appear on store shelves. Across the U.S. farmers are ploughing newly planted fields under, pits are being dug & filled with spoiling food products, dairies are dumping thousands of gallons of milk & other dairy products. Ranchers and farmers are digging pits to dispose of slaughtered pigs, goats, sheep, cows, etc. due to no available market for their goods, because of a totally manufactured non-

pandemic! If this economy does not return quickly, you are going to have a lot more important things to worry about than a severe flu virus labeled covid-19 and making useless masks! If those masks you are making don't fit very, very tight against your face, then your efforts are in vain. If you truly want to begin to grasp what utter destruction others are facing in the country right now, take the merchandise you panhandle and plough it underground. Do that and you'll just start to realize the incredible loss foisted upon our fellow Americans needlessly.

- Bonnie, if you don't feel safe venturing from your home, then by all means stay home. But don't demand that of others! Other people have families to care for and laboring under an illegal house arrest is NOT caring for those family members. Labeling those who wish to be productive as "selfish" is galling and is one of several code words used by the Globalist to bully and intimidate those who choose freedom. It's all over the Internet, you can see for yourself. What a shame that you are a part of that! Those who want to get this economy rolling are not heartless, careless, hateful, irresponsible or unthoughtful towards their fellow man. People who are SICK need to quarantine. Healthy individuals do not. When you are around SICK people, take the necessary precautions. People have taken leave of their senses, including you. It's absolutely amazing how the purveyors of fear can manipulate the Lemmings!
- I am not certain of the protest you reference in your Blog, but If you do not like Americans seeking redress from their out-of-control Government—(Oh, remember those pesky documents mentioned above?), perhaps you've forgotten or may not be aware that a peaceful protest of our Representative Government is a right from God, not a privilege from Government or self-appointed Bureaucrats.
- Just from these scant facts, it is obvious that this covid "crisis" is much more of a political crisis than a medical crisis.
- You are a gifted person in many ways. You would be wise to go beyond the alphabet "news" propagandist and search for real facts. You are paving a path of declination for your business if you keep propagating the half-truths, misinformation and outright lies of the Powers that be, that are determined to annihilate freedom, in whatever form it may present. The divide in our great country is very, very deep. Let's pray that our land will be healed.

I'll close with a favorite quote: "It is easier to be fooled, than to convince people they have been fooled".—Mark Twain.

I expect a full refund for the enclosed merchandise to my Discover Card. Thank you.

With Much Disappointment,

Mrs. Louise Reave
